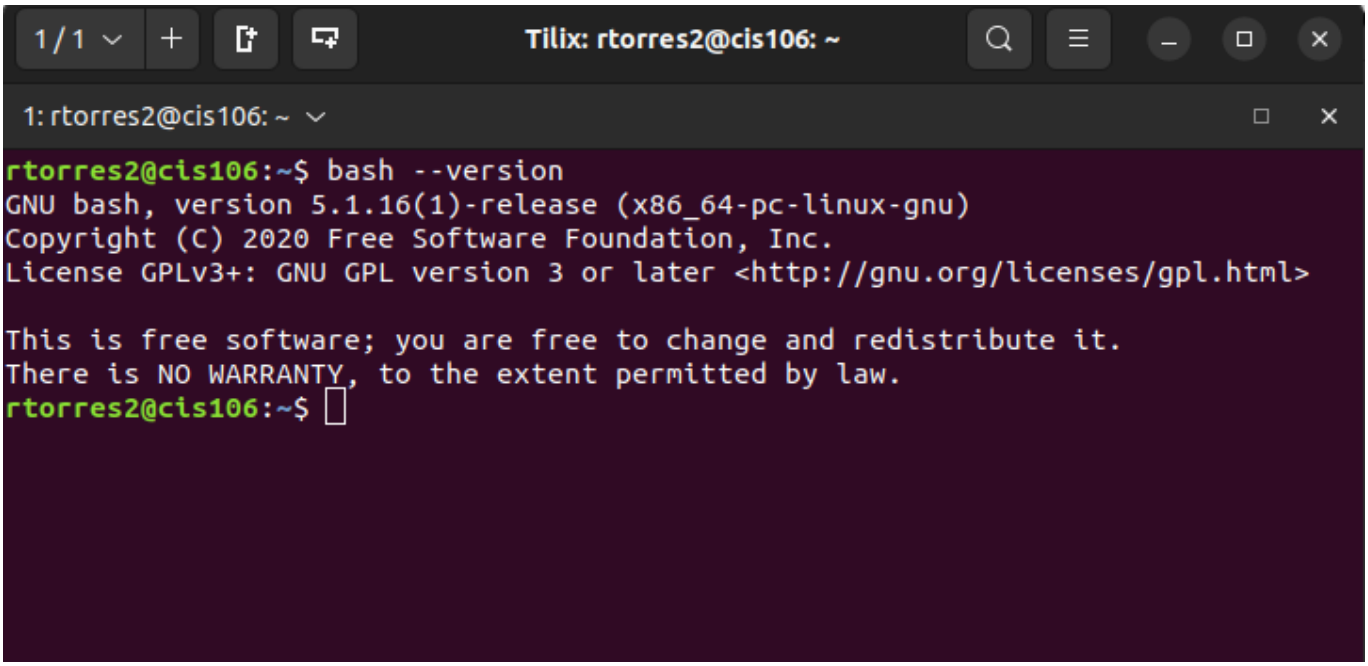
Week Report 3

Completed work for week 3

- Lab 3
- Notes 1

Practice 2: Accessing the bash shell



Practice 3: Using the command history

```
1/1                    Tilix: rtorres2@cis106: ~
1: rtorres2@cis106: ~
  100  bash ~/cis106/labs/lab3/challenge_lab3.sh
  101  bash --verison
  102  clear
  103  bash --version
  104  date
  105  echo "Hello world"
  106  uname -
  107  clear
  108  date
  109  echo "Hello world"
  110  uname -a
  111  history
rtorres2@cis106:~$ !109
echo "Hello world"
Hello world
rtorres2@cis106:~$ !!
echo "Hello world"
Hello world
rtorres2@cis106:~$ echo "hello"
hello
rtorres2@cis106:~$ !!world
echo "hello"world
helloworld
rtorres2@cis106:~$
```

Practice 4: My first shell script

```
1/1                    Tilix: rtorres2@cis106: ~
1: rtorres2@cis106: ~
rtorres2@cis106:~$ bash ~/scripts/hello.sh
hello world
I am learning linux
this is my first shell script
rtorres2@cis106:~$
```

Practice 5: Using Man

```
rtorres2@cis106:~$ uname -s
Linux
rtorres2@cis106:~$ uname -n
cis106
rtorres2@cis106:~$ uname -io
x86_64 GNU/Linux
rtorres2@cis106:~$ man date
rtorres2@cis106:~$ man df
rtorres2@cis106:~$ man free
rtorres2@cis106:~$ man clear
rtorres2@cis106:~$
rtorres2@cis106:~$ man history
rtorres2@cis106:~$ free --giga
              total        used        free      shared  buff/cache   available
Mem:              3           1           0           0           0           0
Swap:             4           1           3
rtorres2@cis106:~$
```

Practice 6: Using help

```
rtorres2@cis106:~$ whatis ls
ls (1)               - list directory contents
rtorres2@cis106:~$ whatis pwd
pwd (1)              - print name of current/working directory
rtorres2@cis106:~$ whatis apt
apt (8)              - command-line interface
rtorres2@cis106:~$ whatis sudo
sudo (8)             - execute a command as another user
rtorres2@cis106:~$
```

Practice 7: Cheat

```
rtorres2@cis106:~$ cheat tar | pygmentize
# To extract an uncompressed archive:
tar -xvf /path/to/foo.tar

# To extract a .tar in specified directory:
tar -xvf /path/to/foo.tar -C /path/to/destination/

# To create an uncompressed archive:
tar -cvf /path/to/foo.tar /path/to/foo/

# To extract a .tgz or .tar.gz archive:
tar -xzvf /path/to/foo.tgz
tar -xzvf /path/to/foo.tar.gz

# To create a .tgz or .tar.gz archive:
tar -czvf /path/to/foo.tgz /path/to/foo/
tar -czvf /path/to/foo.tar.gz /path/to/foo/

# To list the content of an .tgz or .tar.gz archive:
tar -tzvf /path/to/foo.tgz
tar -tzvf /path/to/foo.tar.gz

# To extract a .tar.bz2 archive:
tar -xjvf /path/to/foo.tar.bz2
```

Practice 1: Managing Software

```
(0.26-1ubuntu3) ...
rtorres2@cis106:~$ sudo apt purge bastet
Reading package lists... Done
Building dependency tree... Done
Reading state information... Done
The following packages were automatically i
nstalled and are no longer required:
  apport-symptoms guile-2.2-libs libboost-p
rogram-options1.74.0
  libgnome-games-support-1-3 libgnome-games
-support-common libqqwing2v5
  linux-headers-6.2.0-26-generic linux-hwe-
6.2-headers-6.2.0-26
  linux-image-6.2.0-26-generic linux-module
s-6.2.0-26-generic
  linux-modules-extra-6.2.0-26-generic pyth
on3-systemd
Use 'sudo apt autoremove' to remove them.
The following packages will be REMOVED:
  bastet*
0 upgraded, 0 newly installed, 1 to remove
```

```
rtorres2@cis106:~$ apt search "tetris clone"
Sorting... Done
Full Text Search... Done
bastet/jammy 0.43-7 amd64
  ncurses Tetris clone with a bastard algorithm

ltris/jammy 1.0.19-3build1 amd64
  very polished Tetris clone with CPU opponents

tint/jammy 0.07 amd64
  Tetris clone for text based terminal

rtorres2@cis106:~$
```
